# Discord Joining Handbook

Welcome to Codebasics!

Below are the details on how to join Discord and access the channels to get your doubts answered.

Step-1: Open any of our course videos on the website (login, if you have not already). Below the video, you will see a button called **"Ask on Discord."**

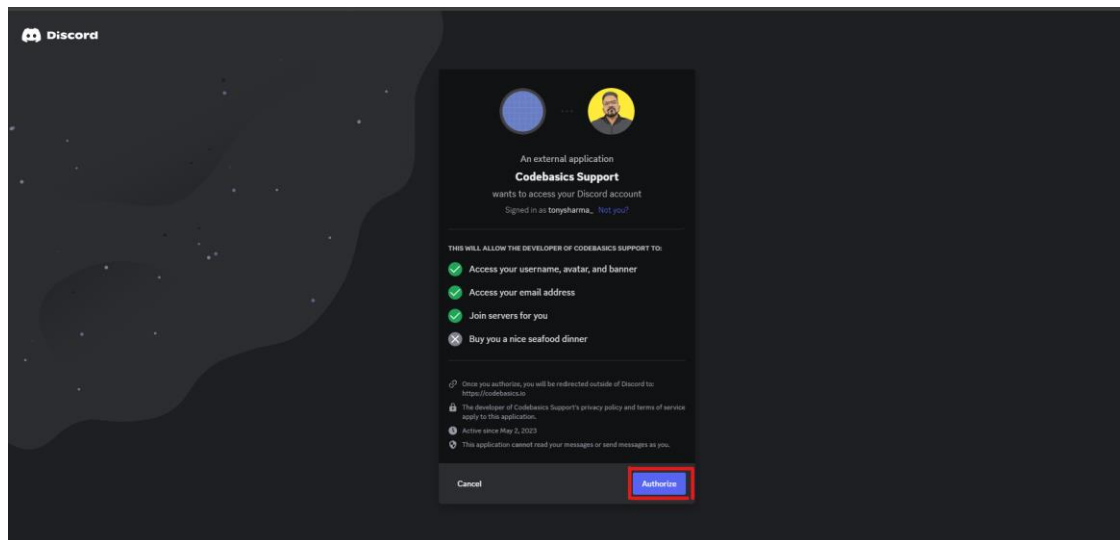

Click on the button, it will redirect you to the Discord.

Step 1A: Enter your Discord credentials, and log in. If you don't have a Discord account, register a new one and log in (make sure to verify your email address after registering)
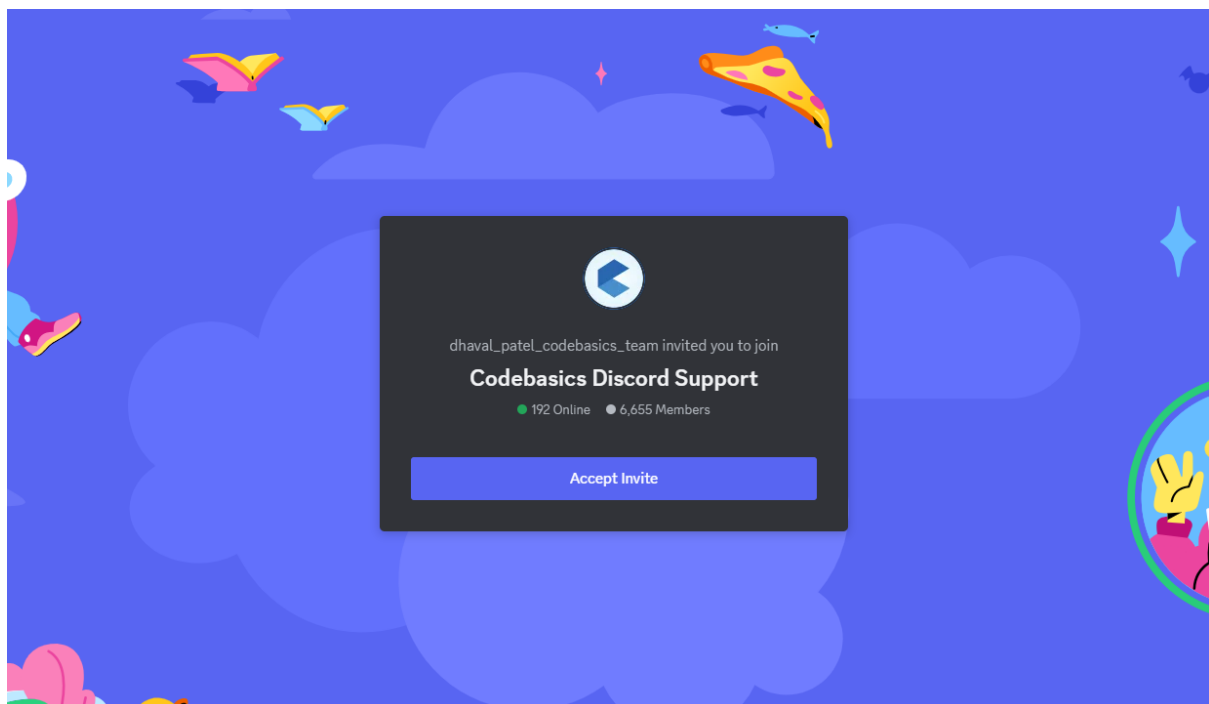

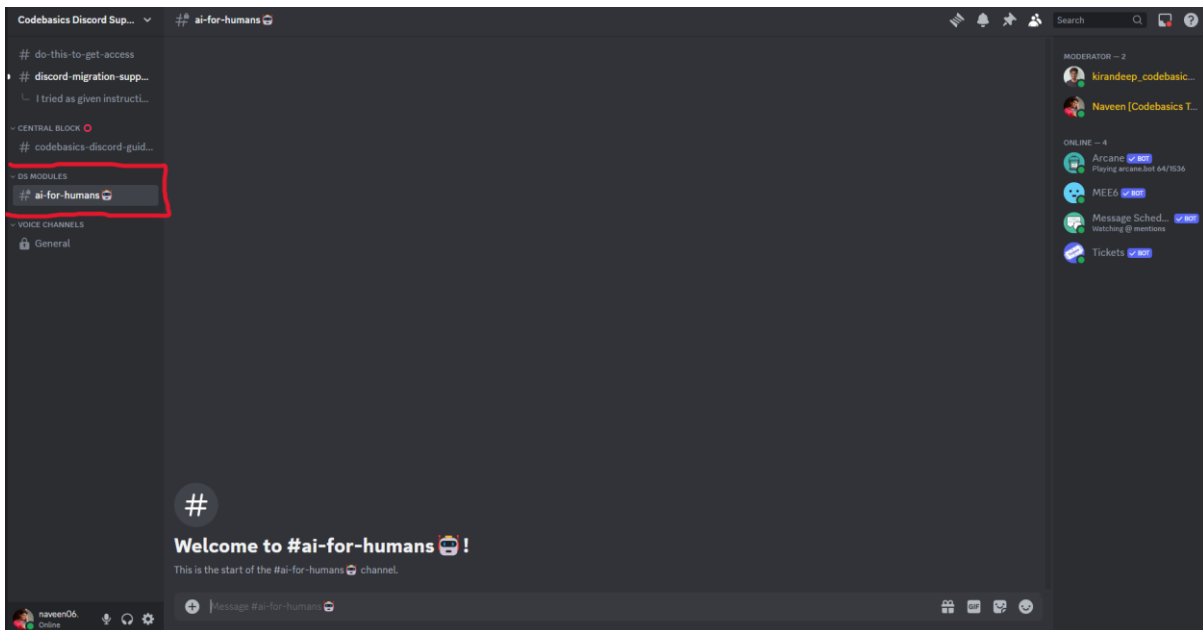

You will land on the below page, after logging in.

(This page will appear on the first time only)

Step-2: Click on the **"Authorize"** button. It will redirect you to the invite page - Accept the invitation.

You will see the channel here (below image) for the courses.

That's it!!

If you are having doubt that how you can get access to other courses? (Incase if you have enrolled in our other courses as well)

1. Just go to that course, and open any of the video.
2. Click on the "Ask on Discord" button again. (There won't be any authorize page this time)
3. And wait for 1-2 mins, it will assign a new role to your account and give you access to the new course channel.

If you have got access to all the required course/s channels, you can ignore the rest of the PDF.

Continue only if you are facing any issues with the above steps.

There may be a few cases where the flow is not as mentioned previously.

For such cases, follow the below steps.

Case-1: Not seeing the **"Authorize Discord Page."**

1. You can link only one of your discord accounts with codebasics account.
   a. Check logging in Discord and see you have access to Codebasics Bootcamp private server.
   b. Else if you have already linked any of the other discord account, but you forgot the access to that account.
      i. You can send a request mail to info@codebasics.io . We will help you out.
      ii. Else contact us on this discord-migration-support channel.

Case-2: I have done all the specified steps above, but still not getting access.

We understand that there may be few exceptional cases, where you may face issues, feel free to reach us at info@codebasics.io

We will support you 🧑

Happy learning 😊
